

UVSecure

UVSS Management Software

Features

- AI technology
- FOD based on plate number
- FOD based on database
- Fast FOD algorithm($\leq 3s$)
- Plate number blacklist & whitelist
- Face recognition
- Face blacklist & whitelist
- Full control to blacklist & whitelist
- Watch livemedia
- Mutiple devices
- No limit to logged users
- User group management

Description

UVSecure Management Software is a powerful and easy to use software for both basic and advanced needs. Except regular user and device management, it has a lot of optional advanced intelligent features, such as Undercarriage Recognition, Vehicle Type Recognition, Foreign Object Detection (FOD), Face Recognition, Number Plate Recognition(NPR), and etc. With simple http standard API interface, UVSS can be easily integrated into your own system.

Specifications

Performance

Image Upload Time	< 1s
Vehicle Type Recognition	Auto
FOD Time	$\leq 3s$
Face Recognition Time	$\leq 3s$
Warning Type	Sound/popup
Space Control	Auto
User Control	Manual
Language	customizable
Black/white list Operation	Add/edit/delete
Number of Black/white list	2000
Number of Images Group	Based on harddisk space
FR Sensitivity Range	0-100
FOD Sensitivity Range	0-8
Display	Auto fit

Hardware requirements

Operation System	Windows 7+
Architecture	AMD64
Memory	8GB
Hard Disk	$\geq 100G$
Processor	\geq Intel I3
Screen Resolution	$\geq 1280 \times 720$
